In November 2002, the voters of the San Bernadino Community College District approved Measure P, a $156 million bond measure designed to improve safety and infrastructure at San Bernadino Community College and Crafton Hills College. Measure P also will construct new classroom buildings and training centers.

The third issuance was received on September 13, 2006 and the development of a Master Plan.

The expenditures for FY08 will be audited by our independent auditor, Eakin, and presented to the Oversight Committee in early 2009.

With the goal of addressing the construction needs identified in the Master Plans developed for each college, the District attempted a $300 million general obligation bond issue in February 2009 but failed to be successful. The specific projects are listed inside on the Citizen Oversight Committee.

The Oversight Committee met regularly during the year to review bond expenditures and get an update on bond projects. They met on July 31 for the annual financial reporting meeting, November 14 and again on March 14 at the District Office. The 2006-07 Annual Report was presented to the SBCCD Board of Trustees on September 13, 2007.

BOND EXPENDITURE UPDATE

San Bernadino Community College began an extensive construction program in 2002 because it was discovered that the campus line made up primarily of single story structures, was unable to meet the needs of students and employees. The construction program included the renovation and replacement of outdated facilities, the construction of new academic buildings, the modernization of existing buildings, and the improvement and expansion of existing facilities to accommodate the growth of the District.

Because federal and state funding was not adequate for the full realization of the project, almost all of the $156 million of construction (451) of Measure P bond monies were allocated to SBCCD. The first issuance was received on December 3, 2003.

The second issuance was for $20 million and was received on February 24, 2004. Almost all of these funds are being used for the construction of major new buildings, including medical education and the development of a Flightline Center.

In addition to reviewing bond expenditures, the Committee is responsible for informing the public concerning the progress of the District and the use of bond proceeds. For the Board, in public session, an annual report.

2007-08 OVERSIGHT COMMITTEE ACTIVITIES

The Oversight Committee also meets regularly to review expenditures and updates on project progress. They meet on July 31 for the annual financial reporting meeting, November 14 and again on March 14 at the District Office. The 2006-07 Annual Report was presented to the SBCCD Board of Trustees on September 13, 2007.

1996

In an attempt to replace Earth Hall, it is discovered that the San Jacinto fault runs through the San Bernardino Valley College campus. Seven buildings are compromised and must be replaced because of the 250-foot wide fault zone.

1997

San Bernardino Valley College

• Construction of Science Building
  • Library
  • Classroom
  • Campus Center
  • Art Gallery
  • Health/Life Science

• Construction of Library as
  • Parking lot for new buildings.
  • Infrastructure Package #4 consists of relocating Verizon incoming services for cabling & equipment.

1998

SAN BERNARDINO COMMUNITY COLLEGE DISTRICT CURRENT CONSTRUCTION PROJECTS

Student Health Services

The Student Health Services project consists of a new modular building, parking area, and landscaping. The structure will house Student Health Services and include private exam rooms, treatment rooms, and offices. Estimated completion: August 2008

North Hall Replacement

The North Hall Replacement project is comprised of constructing a building to replace the current North Hall, the demolition of the existing North Hall Building, new construction, Maintenance/Operations Building and the Science Building. The new construction will be a general education building which includes lecture rooms, laboratories, classrooms, special study areas for various subjects, and offices. Estimated completion: November 2010

Science Building

The Science Building project is comprised of constructing a single new building, site utilities/infrastructure, landscaping, the parking area, and demolition of the old Science Building. The new building will include science education building which includes lecture rooms, classrooms, laboratories, special study areas for various subjects, and offices. Estimated completion: November 2010

Media/Communications Building

The Media/Communications Building will be a 50,000 square foot facility including a new single building, site utilities/infrastructure, landscaping, the parking area, and demolition of the old Science Building. The new building will include science education building which includes lecture rooms, classrooms, laboratories, special study areas for various subjects, and offices. Estimated completion: September 2009

Infrastructure Projects 1-5

• Infrastructure Projects 1-5 consists of relocating Verizon incoming services for cabling & equipment.
• Infrastructure Projects 1-2 consist of the development of the utility corridor from the central quad to buildings on the west end of campus.

BOND MEASURES P & M TIMELINE

2004

• Construction of Science Building
  • Library
  • Classroom
  • Campus Center
  • Art Gallery
  • Health/Life Science

• Office of Infrastructure
  • Demolition begins on SBVC "Classics."  
  • Infrastructure Package #2 consists of relocating Verizon incoming services for cabling & equipment.

2005

• SBVC Campus Center is dedicated on May 3, 2005.
• Jerry Lewis Emergency Center is dedicated

• Measure P is refinanced, bringing an additional $7 million for construction projects and removing the tax liability of our constituents.

• The SBVC Learning Resources Center opens in September.

The new Science Building will be a general education building which includes lecture rooms, laboratories, classrooms, special study areas for various subjects, and offices. Estimated completion: February 2010

The Learning Resources Center will house functions located in the current Library/Art Gallery, which include the Learning Library, the Learning Center, and the Campus Data Center. The Learning Resources Center will allow for the expansion of all of these functions, as well as the accommodations of more varied programs and functions such as distance learning, electronic commerce, audiovisual learning activities, additional curricular and non-curricular services, individual and group study areas, and leisure and work areas for support services. The new LRC will become the central hub for the college’s technology and audiovisual services and support. In addition to facilities that serve primarily the students or the faculty, this facility will house a variety of spaces that can be utilized also for community use. These spaces include a library auditorium, an Art Gallery, a multi-purpose Room, and a Copy Center. Estimated completion: March 2010

2006

• SBVC Campus Center renovation
• Measure P is refinanced, bringing an additional $7 million for construction projects and removing the tax liability of our constituents.

• Measure P is refinanced, bringing an additional $7 million for construction projects and removing the tax liability of our constituents.

• The new Science Building will be a general education building which includes lecture rooms, laboratories, classrooms, special study areas for various subjects, and offices. Estimated completion: August 2010

2007

• Building and Grounds
  • South campus development
  • Central Quad

• The Science Building is dedicated.

2008

• Student Health Services project
• Library

• South campus development

2009

• Library

• Central Quad

2010

• South campus development
• Central Quad

2011
